A little care.
Your daily ritual.

A practical guide to protection, hydration and making room for yourself.

Your morning, made simple.

01 Begin with your usual care.

Cleanse and keep the moisturiser that feels comfortable for your skin.

02 Make room for hydration.

Cloud Mist is optional. Hold 20-30cm away, close your eyes and spray once or twice, following the label.

03 Finish skincare with sunscreen.

Cover exposed skin evenly. General AAD guidance recommends at least a teaspoon for the face. Follow the product directions.

04 Let it settle.

Apply makeup gently afterwards. Give sunscreen about 15 minutes before going outside.

Application guidance: American Academy of Dermatology. Full links on page 6.

Care between the meetings.

When your plans take you outdoors.

Reapply sunscreen at least every two hours outdoors and after swimming or sweating. Use shade and protective clothing too.

When skin feels dry.

An optional mist can provide a refreshing, dewy feel. It does not replace sunscreen or sunscreen reapplication.

When makeup is part of your day.

Think about texture and layering. A facial mist is not a makeup-fixing spray and does not promise longer wear.

When less feels better.

You do not need both essentials. Begin with daily protection and keep the rest of your routine comfortable.

Meet the texture. Keep your own pace.

Your complimentary sachets contain Daily Sun Serum. Try its feel before deciding whether to open the full-size tube.

A small sample does not guarantee that a product will suit your skin.

Introducing something new.

AAD guidance recommends a small-area test twice daily for 7-10 days, following the usual product directions. Stop using a product if it causes a reaction. Seek medical advice for a severe or persistent reaction.

Before opening the full-size product.

Read the ingredients, expiry and product directions. Our sample-first policy covers an unopened, sealed full-size item requested within 14 days of delivery. Read the complete conditions before returning anything.

A little awareness. A simpler routine.

Use your complimentary seven-day tracker to notice habits and comfort. It is not a seven-day results promise.

- ☐ Your finish. Do you enjoy a dewy feel, or prefer a matte finish?
- ☐ Your comfort. How does the product feel alongside the steps you already use?
- ☐ Your day. When are you outdoors, and when do you need to remember reapplication?
- ☐ Your ingredients. Check the full label for ingredients you already know you avoid.
- ☐ Your product care. Follow storage directions. Keep sunscreen away from excessive heat and direct sun.

Your optional calendar file adds a daily routine prompt. It does not replace the application and reapplication directions on your products.

Keep the useful things close.
